I feel this is a repetition of what the GOP Presidents have done since Reagan. Start a war with Iran and the Middle East for profit. Except this time the money is going to end up right in the hands of our leaders. 45 is going to take every possibility to make a profit for himself even if it means the end of our social order. Something needs to be done. 45 is doing things that ignore the courts and the Constitution. The legal system needs to stand up. Congress needs to stand up. The governors need to wake up and stand up. He needs to be impeached.
